

NATALIE GRAY

YouTuber & Inventor

Agent: **Carina Rizvi**

Natalie Gray is a YouTuber and digital personality who has been making engaging and educational content on YouTube for 20 years. Natalie has captivated audiences with her unique blend of humour, enthusiasm, and innovation.

On her YouTube channel, [@NatGrayYES](#), Natalie has cultivated a dedicated audience of 97,000 subscribers with curiosity-led STEM and maker content that explores science, technology, and engineering through build projects and behind-the-scenes access.

In the series [Nat Gray is Trying](#), Natalie explores what is involved in some unusual jobs learning directly from the experts. She has worked with the European Space Agency in mission control, joined the Dartmoor Search and Rescue Team on a night exercise and sequenced DNA at the Francis Crick Institute. In her maker videos, Natalie uses electronics, engineering and 3D printing to design and build projects, repair existing objects and solve problems.

Drawing on her background in broadcast engineering, Natalie brings both technical knowledge and an understanding of how to make complex subjects accessible. Her videos show the process as well as the result, including the practical challenges along the way. Whether she's exploring cutting-edge innovations or taking on an unfamiliar challenge, Natalie's content promises knowledge, laughter, and curiosity.
